HB ELEMENTS, INC.

Established in 1997

HB Elements®, is South Florida's premier manufacturer of exterior architectural millwork. We design and manufacture columns, louvers, brackets, soffit systems and other cellular PVC products.

With over 15 years of experience developing exterior products in the coastal South Florida climate we are introducing an ever evolving product line which is unmatched in durability and beauty. In addition to our product line and existing profiles we excel at meeting custom design specifications.

The combination of innovative techniques, cutting edge technology, and the versatility of cellular PVC gives us more flexibility in design and scale than more traditional building products like wood, aluminum or foam.

Our design style is strongly influenced by British West Indies architecture. Our portfolio features British West Indies home designs of some of the top architects in Florida and the Caribbean, as well as exteriors designed by HB Elements®. We hope that our passion for British Coastal Indies architecture shows in our work and provides design inspiration for others.

Though the British West Indies style might be our first love, our products fit a wide range of architectural styles - Coastal, Florida Vernacular, Key West, Dutch West Indies and more.

HBE PVC Soffit Systems typically have 4 components - fascia, soffit panel, frieze board and rafter tails. These components can be used together as a system or individually. Our v-groove soffit panel and rafter tails create the appearance of a traditional timber framed roof with tongue and groove roof decking.

HBE Brackets, though non-structural, stay true to the design & proportioning of traditional load bearing wood brackets. The versatility of cellular PVC and HBE innovation in manufacturing processes enable us to achieve great flexibility in design and scale. Even our largest brackets are relatively light weight, resulting in easier installation.

HBE columns are available in a wide selection of sizes and styles accompanied by a variety of capitals, astragals and bases, ideal for wrapping existing structural wood, steel or masonry columns. They can be used for most non-structural applications. We can match most custom specifications you may have or we can design an architecturally correct custom column with an unlimited combination of column styles, configurations, capitals, astragals and bases. HBE pedestal columns and matching newel posts tie in seamlessly with most railing systems.

HB ELEMENTS® COLUMN BASES

One of the most visible adaptations of the English colonial style in the tropical climate of the Caribbean is the abundance of louvers. Whether it be in the louvered bahama and colonial shutters covering windows or louvered grilles running between columns at covered porches. The function is to provide shade while allowing breezes to circulate in these living areas.

HBE Grilles and Louvered Panels come in a variety of styles with varied applications. Some run between columns at the beam functioning as sunscreens, while others may be used as louvered privacy walls at balconies. Regardless of the location, the overall result is a significant enhancement in the comfort and ambiance of outdoor spaces, effectively extending the living areas of the home. As with all HBE products, beauty, low maintenance, and easy installation are designed in.

Scan QR Code to view more on our Louvers

HB ELEMENTS® LOUVERS/GRILLES

HBE Closed Louver Panels can be used at gable ends, cupolas, dormers or anywhere a louvered look is desired but a functional louver is not needed.

Through history trellis' have evolved from a structure supporting vine stock to now as an entertaining area or place to get out of the sun. Our trellis and pergola structures are also improved by adding brackets, louvers or grills between columns, and detail panels beside the columns. There are a vast number of beam and rafter sizes & profiles available. Scan QR Code to view more on our Pergolas.

HB ELEMENTS® PERGOLAS / TRELLIS'

HB ELEMENTS® PERGOLAS / TRELLIS'

Our style is strongly influenced by British West Indies and Coastal architecture.

HB ELEMENTS® GABLE DECORATIONS

HB ELEMENTS® DIMENSIONALIZED PVC

With multiple wall thickness options and custom sizing to the 1/8" in length and width, HBE Dimensionalized PVC can be used for a wide variety of applications. 2S is typically used as corner trim while 3s is most often used for beam wraps. 4S is open on 2 ends, 5S is open on one end and capped on the other.

HB ELEMENTS® WINDOW/DOOR SURROUNDS

HBE window and door trims are available in several different configurations:

- Casing
- Casing with extended sill
- Casing with extended sill and header

All window and door trims are factory made, resulting in superior quality to those who made in the field.

They eliminate days of fabrication and reduce installation times and can be used in both siding and stucco applications.

HB ELEMENTS® CASING/SILLS/APPRONS/HEADERS

ELEMENTS STAIN FINISH

- Heat Reflective Paint with a Molecular Bond to Substrate.
- 10 Year Warranty Against Sun Damage.
- Tongue and Groove and Nickel Joint Boards.
- Finish can be Applied to Matching Moldings, Beams, Brackets, and Soffit Systems.
- Extremely Durable. Comes with Touch Up Kit.
- Easily Refurnished that can be Done by Your Professional Painter.
- Maintenance is Hygiene, Soap and Water.
- Easy to Clean and Maintain. Simply Hose Off Without Leaving Any Water Stains.
- No Termites or Bug Issues.
- Forever Lasting Natural Wood Feel with no Real Upkeep.
- Product is 18 Feet Long so it can be Installed with Less Seams.
- No Hand Selecting Usable or Straight Boards, Everything is 100% Usable – NO WASTE
