THE TIMELESS BEAUTY OF WOOD, BUT WITHOUT THE MAINTENANCE

Elements Stain Series is a product leading in the future of exterior ceilings and overall wood exterior stain finishes. It is a product created to simply improve the experience of owning wood ceilings and exterior wood products. The purpose was to eliminate maintenance but to also improve the durability of the finish.

With wood and stain finishes being such a popular way to detail and decorate a home, the building community knows that stains do not hold up in coastal, high salt, high moisture environments. So, the exterior woodwork will always require the need to sand, prep, and refinish.

WE LISTEN.
WE DESIGN.
WE MANUFACTURE.
WE DELIVER.
